

MOBILE WASH™

MW30 30 Gallon Mobile Wash unit with battery operated pump

MW60 60 Gallon Mobile Wash unit with battery operated pump

Make **Mobile Wash™** part of your Emergency Preparedness and Decontamination Programs. **Mobile Wash** does not replace your OSHA requirement for your emergency shower and eye wash stations, but when you have a scheduled or un-scheduled water shut down at your facility, it does allow you to satisfy OSHA regulation [1910.151\(c\)](#)

“Where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use.”

While this regulation deals primarily with employees or people working on site, the mobility of **Mobile Wash** in an actual public emergency allows you to bring the wash to the patient instead of bringing the patient to the nearest shower or eye wash station. Imagine having a **Mobile Wash** you could bring to your decontamination site during a public emergency!

During a water outage when your **STERILE** water supply is fixed or highly limited, water conservation is vitally important. Because the hand held spray heads can be targeted at the exact area that needs to be irrigated or washed, **Mobile Wash** allows you conserve that vital water supply and treat more people! Remember, what goes down the drain *cannot* be used to help another person!

For day in, day out situations like construction or plumbing maintenance, you can also be proactive by stationing a **Mobile Wash** in critical areas of your hospital where the wash stations would be affected by a water shut down. Remember, [ANSI/ISEA Z358.1-2009](#) standard says emergency showers and eye wash stations shall be located in an area that requires no more than ten seconds to reach!

MOBILE WASH FEATURES:

- 30 or 60 gallon capacity tank
- All Stainless steel construction with 5” polyurethane casters for easy mobility (4 swivel)
- Stainless storage box to hold all PPE supplies (gloves, masks, sterile rinse heads and hand sanitizer)
- **Dual** sterile Point of Use spray heads on 15’ coiled hoses
- 12 volt 5.5 GPM pump and built in pressure switch

MOBILE WASH™

DIMMENSIONS (MW30 & MW60):
